

European Association for the Research, Innovation, and Safety of the Circus Arts

Presentation

AERISC is a non-profit association founded in Brussels whose aim is to:

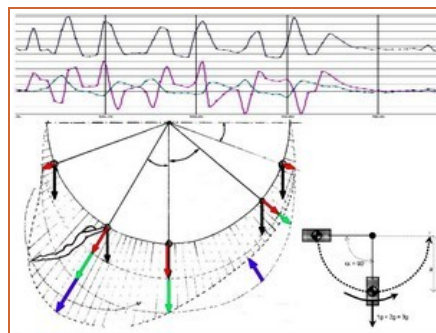

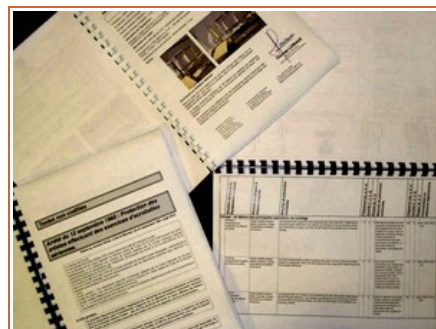

« Promote the awareness of safety concerns in the fields of entertainment, event, audiovisual, and particularly the circus arts »

AERISC operates in 3 sectors:

- Information and Training
- Research
- Technical Support

The **AERISC's** resources and knowledge are acquired through practice missions and research campaigns carried out in the technical and teaching fields. This information is distributed through training sessions, public relations, partnerships, and the www.aerisc.com website.

Thanks to its position and expertise, **AERISC** is the natural partner for artists and technicians in the resource, information, and training sectors, as well as federations, schools, companies, and contractors in the fields of consultation, injury prevention, risk management, and equipments certification.

Missions

Training sessions for entertainment technicians:

AERISC offers training sessions, programmes, and teaching aids for entertainment and circus technicians:

Working at extreme heights, rope tasks, assembling structures and circus tents, load hoisting, apparatus installation, raising awareness of risks, legal knowledge, physics knowledge, etc.

Risk prevention:

AERISC operates as a service provider in charge of health and safety protection, injury analysis, and injury prevention during the production of shows, events, and film shootings.

Technical support:

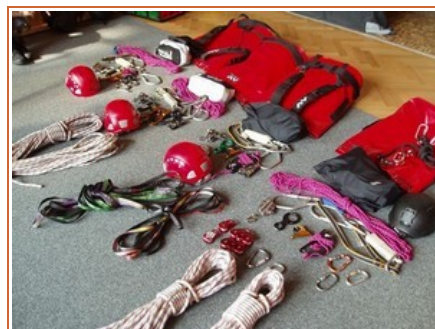

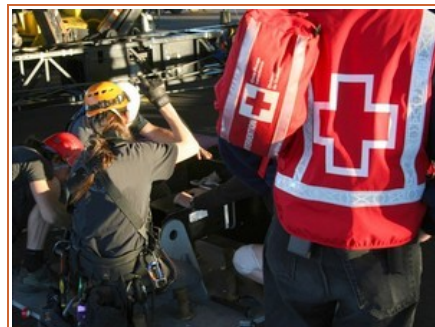

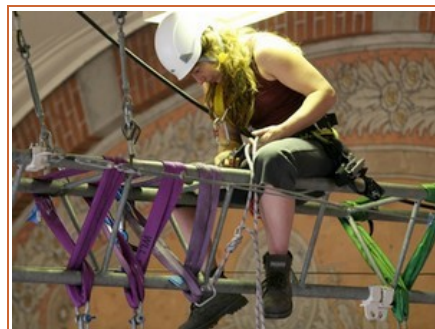

AERISC offers technical support in design and renovation of sets, development and installation of equipment, writing technical documents, etc.

Research for acrobatic equipment:

AERISC researches and develops aerial acrobatic equipment for shows, develops new acrobatic solutions, optimizes safety devices, etc.

Communication:

AERISC participates in conferences, seminars, meetings, and international work groups, afterwards communicating this new information with its members, and managing the technical resources.

Partners

-  FEDEC European federation of professional circus schools
-  FFEC French federation of circus schools
-  CNAC Circus arts national centre of Chalons-en-Champagne
-  EN PISTE Canadian circus arts network
